Store your Cover WET using Stow Away

Stow Away is a cleaner and deodorizer used for preparing pool covers for storage. It eliminates the objectionable, musty odors on pool covers and prevents the cover from sticking together when folded. Stow Away helps remove stains and soil and controls mildew. The cover may be stored wet, and Stow Away will keep it clean and fresh and can even extend the life of the cover. It can also be used on solar covers, pool umbrellas and other poolside items.

To use Stow Away:

1. Remove loose leaves and debris from the cover, and then rinse it off with a hose.
2. Apply Stow Away liberally over the cover and scrub with a nylon bristle pool brush.
3. Rinse the loosened soil, and then apply another thin coat of Stow-Away evenly over the cover.
4. Fold the cover and squirt Stow Away between each fold.
5. Store the cover in a plastic container (trash can with wheels).

NOTE: Avoid physical contact with product. Follow safety information on label instructions. Store in a cool, dry place. Keep out of the reach of children.
