“Your Leader in Backyard Vacation Fun”

Optimizer Plus

Optimizer Plus is a granular product that enhances water comfort, increases water clarity, improves the performance of other products and suppresses the growth of algae. It buffers the water to prevent pH bounce and does not evaporate with exposure to sunlight. Optimizer Plus provides blue, sparkling water and makes the water feel more comfortable to swimmers.

To use Optimizer Plus:

1. Backwash and clean the filter.
2. Balance pool water and adjust pH to between 7.4-7.6. Leave the pump running.
3. For Chlorinated or Brominated pools, broadcast Optimizer Plus at a rate of 1.7-2.8 lbs per 1000 gallons to establish 30-50 ppm.
For SoftSwim Pools, broadcast Optimizer Plus at a rate of 2.8-4.5 lbs per 1000 gal to establish 50-80 ppm. Divide into 3 doses and add each third waiting 8 hours between each dose.
4. 1 hour after each dose, adjust pH to 7.4-7.6.
(You will use approximately 1 lb of Lo-N-Slo for every 2 lbs of Optimizer Plus)
5. Within 10 days retest the Optimizer Plus level. If the level is below 30 ppm for chlorinated or brominated pools, or below 50 ppm for SoftSwim Pools, reapply.

Maintenance Dose

Test the Optimizer Plus level monthly and maintain 30-50 ppm for chlorinated or brominated pools and 50-80 ppm for SoftSwim Pools. 1 lb per 1,000 gallons increases Optimizer Plus level 18 ppm.

NOTE: Avoid physical contact with product. Follow safety information on label instructions. Store in a cool, dry place. Keep out of the reach of children.
