

Biography:

BEAU BRADY

ASSISTANT DIRECTOR

[vCard](#)

Beau Brady joined GlassRatner in 2015 with a background in Financial Planning and Analysis (FP&A) and was instrumental in the creation of the Performance Management (including compensation) system in use by the salesforce of the national homebuilder, PulteGroup. Mr. Brady received his Bachelor of Business Administration in Economics from Kennesaw State University and specializes in the areas of Business Intelligence (with an emphasis on automation), "big data" analytics, and data visualization.

Recent contributions at GlassRatner include:

- The automated consolidation and analysis of 1,280 "canned" SAP P&L reports received from opposing counsel during SNMP v. Nortel
- Regular creation and hosting of SQL Server databases to store and organize large datasets
- Analysis of every paid advertising item (i.e., print and digital listings and their associated enhancements) sold by a leading print advertising company throughout the state of California.
- Construction of a general ledger from operational data (i.e., scratch) for a full-service import export company.

Mr. Brady also has international business experience including serviced P&L management for Central and South America, offshore Operations personnel management, and litigation support for foreign legal matters. He received his Bachelor of Business Administration in Economics from Kennesaw State University.
