

# JEANNE AULBACH, CCM, MCSD, MCT, MCITP

## DIRECTOR OF DATA ANALYTICS & BUSINESS INTELLIGENCE

[vCard](#)

Jeanne Aulbach has 27 years of experience in Information Technology and Business Intelligence. This includes over 12 years as an independent consultant providing application development and process improvement to corporate clients in insurance, retail services, commercial property management, manufacturing, and non-profit services. Prior to moving into technology, Jeanne worked in banking in retail banking, financial reporting, capital markets, and cash and treasury management.

Jeanne's accomplishments include:

- Integration of historic financial and sales information from an acquired company into the parent's data warehouse and reporting systems. The integration process was also used for system conversion.
- Creation of a master product catalog to track sales of actual product in the data warehouse and reporting systems.
- Creation of a process to match shipments with vendor billing and audit costs.
- Creation of a data mart to support the performance dashboards she created.
- Creation of an application to support the manufacturing process and inventory tracking for a client. Included the tracking of products through the manufacturing process as well as quality control.
- Creation of a customizable application to support assessment of commercial real estate, including the ability to prioritize and provide cost estimates for maintenance projects.
- Creation of an application to organize events, including automated task scheduling and production of documents.
- Creation of an application to automate the quote and issue of insurance policies, including the automation of related documentation.
- Provided Microsoft Certified Training in SQL Server Administration and Development, and .Net programming and development.
- Interfaced a vendor securities processing system with the bank's DDA and General Ledger systems, eliminating hundreds of manual paper entries.
- Created an automated process to rate lock box providers for corporate clients based on responses to a standardized questionnaire. This included a score and a written evaluation.
- Provided treasury management reviews to corporate clients.

Jeanne has held multiple certifications: Certified Cash Manager (CCM), MSRB Registered Municipal Securities Representative and Principal, Microsoft Certified Solutions Developer (MCSD), Microsoft Certified Trainer (MCT), Microsoft Certified Information Technology Professional (MCITP) in SQL Server Administration and also Business Intelligence.
