

Biography:

BRIAN CASNER

DIRECTOR - CONSTRUCTION ADVISORY SERVICES

[vCard](#)

Brian Casner is a construction management professional with ten years of industry experience. He is a Director with GlassRatner, where he focuses on the provision of construction advisory and dispute resolution services. Brian began his career as a project controls specialist for the Department of Energy – Environmental Management on the remediation of nuclear waste for nuclear weapons complexes. He has served as a construction scheduler on projects including nuclear power plants, capital upgrades for coal burning plants, the new Mercedes-Benz Stadium in Atlanta, and as a global program schedule manager on data center upgrades.

Brian is accustomed to performing on time-sensitive, mission critical construction assignments, balancing the management of technical compliance to contract requirements, coupled with meeting overall program schedules and budgets in order to advise multi-client stakeholder groups. Brian has expertise in the areas of:

- Construction planning
- Project scheduling & program coordination
- Forensic schedule analysis
- Construction cost analysis
- Damages quantification
- Project management
- Project controls
- Contract management
- Change order management
- Construction litigation and litigation support

Prior to joining GlassRatner, Brian held a management position at CBRE, was a scheduler at Holder Construction Company and High Bridge Associates, Inc., and a forensic analyst at David Pattillo & Associates.

Brian attended Clemson University where he earned a Bachelor of Arts – History, as well as a Project Management Certification from the University of Georgia Terry School of Business.
