

Vehicle & Machinery Extrication

This training encompasses significant hands on applications of vehicle stabilization and extrication as well as machinery stabilization, disassembly and or removal.

The Guardian Centers/Spec Rescue International vehicle, machinery NFPA 1006 compliant 5 day course is a hybrid presentation of vehicle and machinery rescue training. Specifically, the vehicle skills are applicable to common vehicles and environments that are not deemed a high risk. Similarly, machinery rescue skills focus on common, simple, small machinery extrications usually involving digits or machinery that can be easily disassembled or cut, spread or lifted.
