

TECC

Patrol Officer Course

November 4-6, 2014

First Responder level application of life saving medical interventions for use during disaster and high threat situations.

In cooperation with Tribalco LLC - Division 6: Survival Systems, Guardian Centers offers its inaugural TECC Course geared toward patrol officers. TECC is designed around TCCC, the military standard for battlefield care, adapted for use in the civilian community. Students will gain insight into current TECC protocols and their implementation taught by Special Operations Veterans. Lecture and scenario-based training is up to date with feed back from recent domestic events direct from the agencies involved. Hands-on training is designed to make TECC practices second nature. Officers will be instructed in life saving interventions across the three phases of TECC: Direct Threat Care, Indirect Threat Care, and Evacuation Care.
