

Heavy Equipment & Rigging Specialist

This program utilizes a FEMA H.E.R.S curriculum and FEMA instructors. The primary purpose of this course is to provide functional training to US&R and/or Fire Department members who may be called upon to perform the duties of a rigging specialist during an emergency.

The Heavy Equipment Rigging Specialist course is a 4 day – 32 hour program developed by the FEMA Instructors and subject matter experts for encompassing structural collapse training for assessing and mitigating all types of collapses in all types of buildings to facilitate rigging and crane operations. The training integrates elements of physics and engineering concepts and is heavily weighted with practical applications of heavy building construction, weight calculations and configurations and the stabilization and removal of heavy objects in a safe and efficient manner.
